

Facilitating food donations. Fighting hunger in the U.S.

200 food banks. 60 thousand food pantries
and meal programs. 40 million Americans fed.

For more than 40 years, Feeding America has responded to the needs of individuals struggling with food insecurity. In times of uncertainty, we have not wavered from our mission to end hunger.

When you partner with Feeding America, you can trust that your donations will be safely distributed to the people who need them most

Using a collaborative and coordinated approach, we help member food banks maximize their impact, and serve more people than they could on their own.

In addition to serving neighbors in need, your donations help us:

Achieve environmental sustainability goals and reduce waste

Rely on our custom food safety and recall guidelines in line with national legislation

Improve tracking and reporting on donations using our store-level capabilities

Build connections, by keeping donation efforts localized to your community

Collaborate with 501(c)(3) charities via our centralized donation process

Save time and money by eliminating dumping fees and leveraging our transportation

Food Industry Partnerships is here to support you.

Food Industry Partnerships (FIP) Account Managers serve as the liaison between donors and food banks. In addition to providing personalized account management services, our team goes above and beyond to support your donation strategies.

Standardized national reporting and tracking

Standardized national reporting makes it easy for donors to see how many pounds of food they have donated enterprise-wide and offer the data needed to generate accurate tax deductions.

Feeding America's custom, web-based app MealConnect facilitates the safe and quick donation of fresh, healthy food by matching these products from grocery stores and foodservice operations to local food banks or pantries.

Our reporting services include:

- Formulating, reviewing, and distributing digestible reports
- Identifying anomalies across enterprise-wide donations
- Leveraging the data to collaborate on efficiencies and solutions

Disaster support

In the days, weeks and months that follow a crisis, food bank programs—from mobile food pantries to donation partnerships with food and grocery manufacturers—are amplified to support a coordinated disaster response. Every step of the way, your Account Manager will serve as the liaison to our disaster team to ensure we are there for impacted individuals, offering food and hope as they seek to return to normalcy.

Personalized account management

Your FIP Account Manager will serve as your main contact for future operational and business planning, as it relates to your food donation. **We manage this partnership by:**

- Ensuring high operational standards and mitigating risks across the network
- Creating operational efficiencies across the supply chain
- Evaluating effectiveness of programs and innovations
- Harnessing technology to reduce cost and promote efficiency
- Scheduling a cadence for program review, development, and expansion
- Providing regular list matching services to keep you informed on our network
