The screenshot shows a project submittal form for the MHI Solutions community. It includes sections for Project Description, Challenges Facing, Goals, Describe Current Operations, and What Processes Does This Project Impact? The form is partially filled out with checkboxes.

PROJECT

PROJECT DESCRIPTION: Upgrade current Brownfield facility with state of the art automation

CHALLENGES FACING:
Brownfield is currently in 2 buildings that total 1 million sq. feet. We are running an omni channel operation serving our retail stores and DTC customers. We wish to consolidate all processing into our 650K sq./foot facility. We will need to limit disruption to the current operation during the demo, infrastructure upgrades and installation. We will need to have

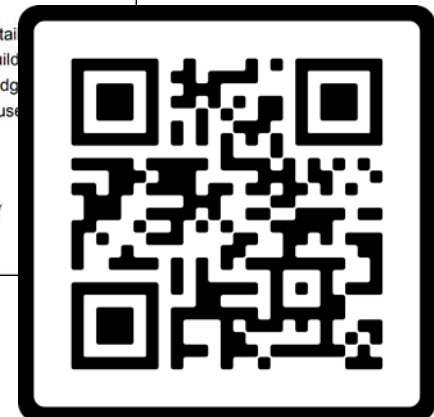

GOALS:

☐ Increase inventory turns	☐ Reduce employee injuries	☒ Save floor space	☐ Order accuracy
☒ Reduce labor	☒ Reduce machine downtime	☐ Inventory accuracy	☐ Increase visibility across facility (where is order in process)
☒ Reduce time to from order to ship	☐ If other, please explain...		

DESCRIBE CURRENT OPERATIONS:
Currently run an omni channel operation in 2 buildings totaling 1 million sq. feet. Retail processed in our 400K building (approx. size) and DTC is processed in our 650K building (Approx. Size) and we share inventory between both buildings via a conveyance bridge. Retail currently uses both automation and a more manual put to light system. DTC uses

WHAT PROCESSES DOES THIS PROJECT IMPACT?

☒ Transport Material	☒ Pack	☐ Assembly-Kitting	☒ Returns
☒ Storing Material	☒ Ship	☒ Receiving	☐ Information Visibility
☒ Pick	☒ Sort	☐ If other, please explain...
